### Care before and after installation:

- Release water for two minutes before installation of faucets or concealed parts in order to be free from blockage, damages and trouble free operation. Such damages are not been warranted by the company.
- Always use CAVIER water scale cleaner for cleaning for instead of detergent agents for long life of chromium finish.
- Salty water and salty weather (coastal areas) can cause dis-function of faucets and gradual fading chromium.
- We recommend water softener to be installed where water TDS lever is more than 300mg/L

**AERATORS**

Devices that mix air with water to give a soft and splash-free flow.

- Our integrated honeycomb-structured aerator, provides lime buildup protection
- Integrated anti-clogging dome screen of the aerator filters sediments and dust particles
- The maximum allowable TDS level should not exceed 300 mg/L for the better performance of Cartridges, Aerators & Spindles.

**CHROME FINISH**

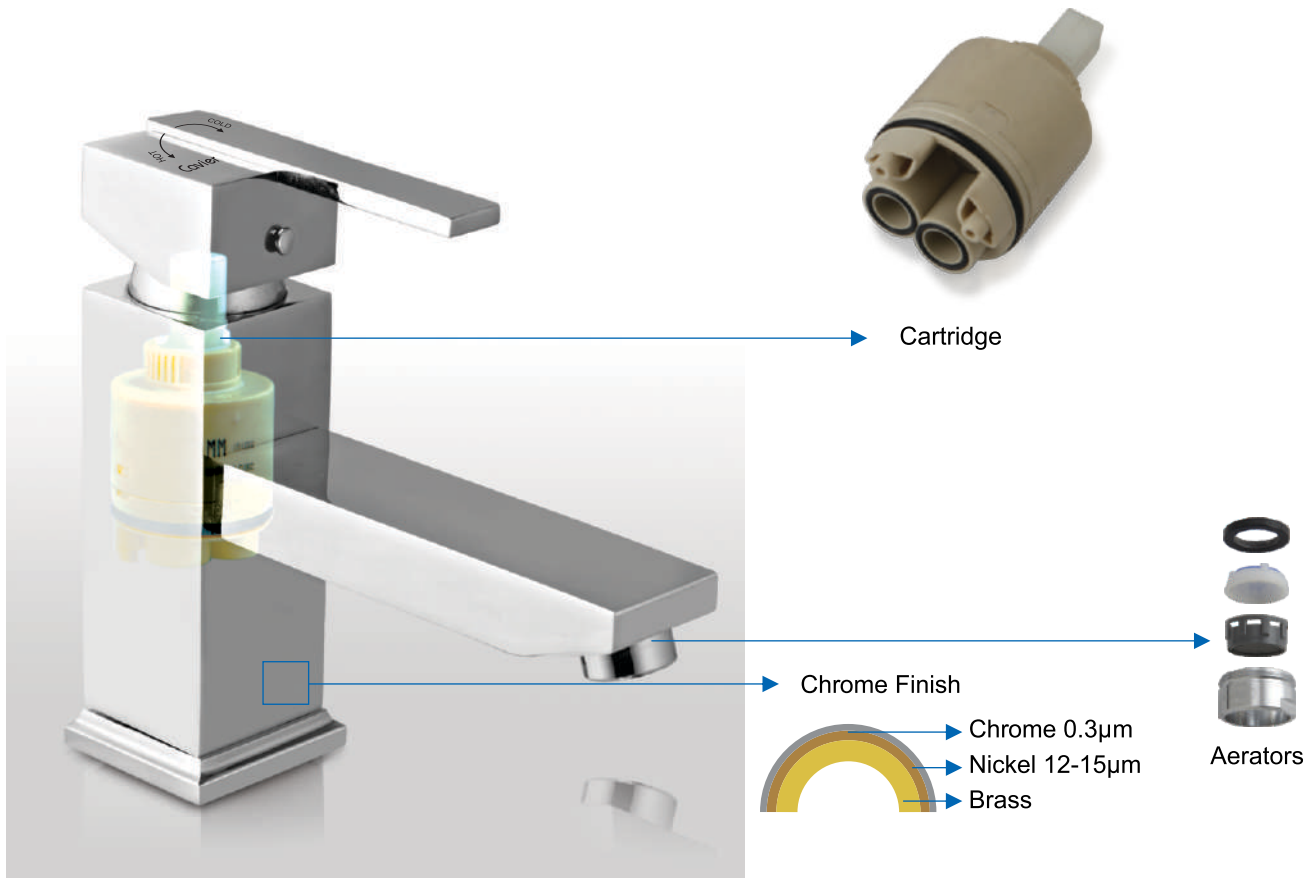

Upper shiny protection layer provides a mirror finish to every faucet.

- High plating thickness (Nickel: 12-15 microns and Chrome: 0.3 microns) provides tolerance to extreme climate and water conditions
- 72+ hours of salt spray test ensures our finishes are highly durable and corrosion resistant for a much longer duration.

**CARTRIDGES**

The heart of every faucet, the cartridge is responsible for controlling water supply.

- Cavier cartridges are 5 lacs cycle tested to give a longer and trouble free operating life of upto 20 years (considering 60-70 operations per day)
  - Wide angle of lever provides ultra comfort and flawless, smooth operation
  - Our cartridge spindle is made of brass instead of plastic, to avoid breakage
- Works smoothly even at high temperatures (85 degrees) and in various pressure conditions (0.5 -5 bar)

# LEAD FREE

## LEAD-FREE FAUCETS

Lead-free faucets can reduce the potential of lead in drinking water and the adverse health effects associated with lead exposure.

## LEAD-FREE ACT

The reduction of Lead in Drinking water Act was signed into law on January 04, 2011 and was implemented on January 04, 2014. Lead free refers to <0.25% weighted average lead content in relation to wetted surface of pipe, fittings, and fixtures in systems delivering drinking water for human consumption. This is also known as Safe Drinking Water Act.

## THE DANGER OF LEAD

Infants and children are the most affected with consuming the water containing excessive lead. This can lead to experience delayed physical and mental development, while adults who consume it could develop kidney problems or high blood pressure. For as far as we know, lead fulfills no essential function in the human body, it can merely do harm after uptake from food, air or drinking water.
